Claims 1, 13 and 14 are presented for examination.

The amendments and remarks filed on May 18, 2009 have been received and entered.

Claims 1, 13 and 14 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Goodman et al. (WO 98/27960) in view of Fleischer (1999, abstract only): or Fleischer (1999), Miller et al. (1980, abstract only) and further over Canadian Patent 2161737 for the reasons set forth on pages 2-3 of the office action of December 16, 2008.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive for the reasons set forth in the office action of December 16, 2008. Applicant in his remarks argues that MacKay et al. is silent with respect to the treatment of atopic dermatitis, which is the disease to be treated by present invention. Applicant is reminded that Mackay et al. was used to show that metronidazole has been previously used at the claimed concentrations for the treatment of inflammatory skin disorders. Therefore, it would have been obvious to use such concentrations for the treatment of any inflammatory skin condition, such as atopic dermatitis. The use of a gel instead of suspension does not create a patentably distinct use in the absence of evidence to the contrary.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
